

Mather Process Solutions

Remanufactured 100-8 Breeder

Mather Process Solutions Remanufactures Batter and Breeding Equipment, we have been involved with the OEM design and remanufacturing of these machines for over 30 years.

Do you have a worn out breeder that requires constant maintenance or causes frequent down time?

We can save your breeder and make it look/perform like new for a fraction of the cost of a new one

Or we can use one of our good cores and make you a fully remanufactured unit.

Mather Process Solutions

Remanufactured 100-8 Breeder

Not sure which breeder you need? We can help with that also, we have extensive knowledge in further processing and can make sure you get the correct machine for your application

We will also provide start-up and training on your new breeder if required

Do not need a complete machine? We have sourced and can supply all of the parts used in our remanufacture program for your existing machines and normally save customers 10% to 20% in parts costs

The following is a 100-8 breeder that recently went through our shop

Mather Process Solutions

Remanufactured 100-8 Breeder

- 100-8 Breeder before start of job
- Corroded Electric motors
- Missing guards
- Non OEM parts and modifications
- Damaged sheet metal

Mather Process Solutions

Remanufactured 100-8 Breeder

- 100-8 Breeder remanufactured
- All new Hydraulics
- All new bearings
- All new belts
- Repaired sheet metal
- Warranty

Mather Process Solutions

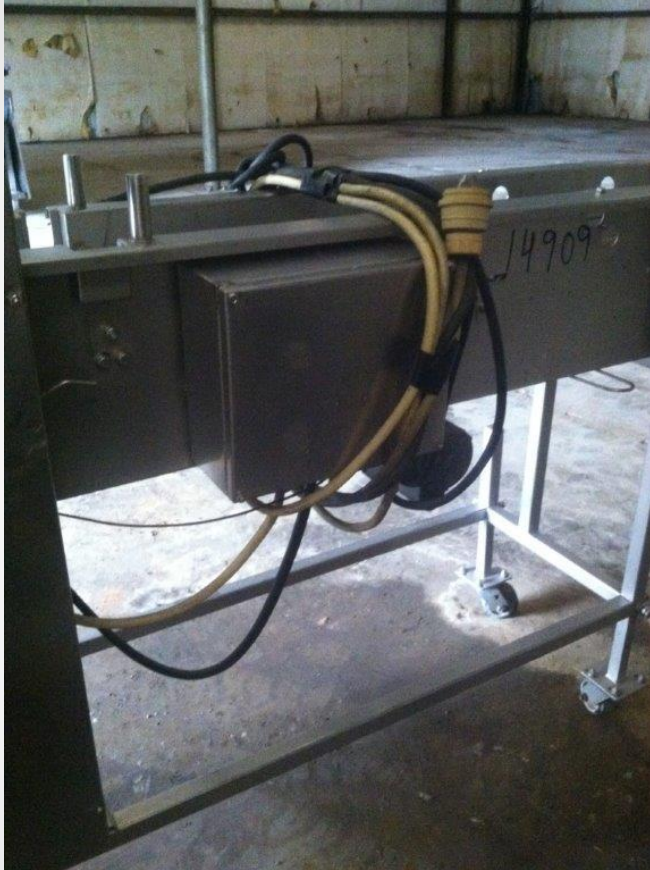

Remanufactured 100-8 Breeder

- 100-8 breeder is stripped down to the bare frame
- Repairs are then made to the frame and whole machine is sent to be bead blasted, except for the areas where breeding flows, these areas need to be polished

Mather Process Solutions

Remanufactured 100-8 Breader

- Electric control panel before conversion to hydraulic drive

Mather Process Solutions

Remanufactured 100-8 Breader

- Hydraulic manifold after remanufacturing

Mather Process Solutions

Remanufactured 100-8 Breader

- Main conveyor drive before remanufacturing

Mather Process Solutions

Remanufactured 100-8 Breader

- Main conveyor drive after remanufacturing
- Direct drive on hopper, cross auger and main belt
- New stainless steel couplings
- New nickel plated hydraulic motors
- New hydraulic hoses and fittings

Mather Process Solutions

Remanufactured 100-8 Breader

- If hoods and guards are damaged or missing we make all new ones and electro-polish them before installation for a more sanitary finish

Mather Process Solutions

Remanufactured 100-8 Breader

- All machines come with a new set of stainless steel casters with brakes

Mather Process Solutions

Remanufactured 100-8 Breader

- New Blower tubes

Mather Process Solutions

Remanufactured 100-8 Breader

We replace the “special” OEM bearings with standard 2-bolt bearings that you can get locally off the shelf

Mather Process Solutions

Available Parts

- The standard OEM bearing to the left can be rebuilt
- We supply item #3 and #4 from the diagram below.
